Insights into Objective Data Provided by Digitally Connected Inhalers:

EXPLORING PERSONALIZED DIALOGUES IN HEALTHCARE

SATURDAY, JULY 24, 2021 • 8:00 AM (CDT) - 9:00 AM (CDT)

SPEAKERS

ANTONIO ANZUETO, MD
Chief, Pulmonary Section
South Texas Veterans Health Care System
San Antonio, TX

J. ALLEN MEADOWS, MD
Solo practitioner at Alabama Allergy & Asthma Clinic
Clinical Instructor of Allergy
Montgomery, AL

PROGRAM DESCRIPTION

Assessment of inhaler use in asthma continues to be a challenge, as patient-reported symptoms and inhaler usage can only provide subjective information. Join us on Saturday, July 24, at 8:00 AM (CDT) for an engaging program, as Antonio Anzueto, MD, and J. Allen Meadows, MD, discuss the role of objective data from digital inhalers in patient care. Hear from clinical experts on how objective data may help inform healthcare providers about a patient's personalized inhaler use and contribute to a shared decision-making partnership.

Expert Technical Advisors. Better Business Outcomes.

Solving Complex Problems is in our DNA

As business operations become more entwined with data and technology, cyber attacks are becoming more complex and disruptive to organizations' operations. Organizations today need a Technical Advisor that they can turn to and get the technical expertise they need when they need it most.

At MOXFIVE, solving problems is who we are and what we do. Our Technical Advisors bring technical expertise at the strategic level to help organizations of all types solve their most challenging technology-related problems. They have managed and led many of the most prolific security investigations in the world and have the unique ability to connect the dots between business, IT and security objectives to tailor solutions to each organization.

Working with MOXFIVE Technical Advisors provides the following benefits:

Faster Recovery

MOXFIVE Technical Advisors have a proven process to manage investigations and work quickly to help establish the most efficient technical response strategy.

IT & Security Expertise

With deep understanding of both security technologies and the insurance industry, MOXFIVE has helped thousands of insureds recover from breaches and navigate the cyber claims process.

Experts at Scale

MOXFIVE maintains an ecosystem of the industry's best technology experts and service providers so that we can quickly assemble the right team based on the skills you need.

Resilient Outcomes

MOXFIVE provides advisory and implementation services to address the business process and technology requirements needed to build resilient security operations.

Incident Management

MOXFIVE provides the clarity and peace of mind needed for attack victims during the incident response process. Our Technical Advisors serve as an Incident Coordinator to clearly define the incident, the action plan to be executed, and manage the incident response efforts.

The expertise you need to tackle today's cyber threats

At MOXFIVE, our mission is to minimize the business impact of cyber attacks and be that “go-to” technical resource for our clients - whether before, during or after an incident. Through our **Incident Management** and **Business Resilience** offerings, our Technical Advisors help our clients shore up the basics of sound IT infrastructure and security practices to proactively protect against today’s threats as well as help navigate the response process should something happen.

Incident Management

Innovative incident response strategies led by MOXFIVE Technical Advisors help mitigate losses and minimize disruption to business operations. We engage and lead the optimal service providers and technology solutions based on our deep knowledge of the industry resulting in putting victims in a better place than before the attack.

Business Resilience

MOXFIVE helps our clients assess technology gaps - both pre- and post-breach – to understand which technologies are needed to build more resilient operations. To address the evolving business landscape, many organizations are realizing that not only do they need a more robust group of technical service providers – they also need someone who can help manage and streamline the selection and implementation process.

Our Resilience offerings include:

 Advisory Services <ul style="list-style-type: none">• IT & Security Strategy• Security Services• Retainer Services	 IT Infrastructure <ul style="list-style-type: none">• Asset Management• Cloud Services• Backup Infrastructure• Storage
 Managed Services <ul style="list-style-type: none">• IT Services• Security Services• Security Awareness Training• Dark Web Monitoring	 Security <ul style="list-style-type: none">• Multi-Factor Authentication Implementation• Endpoint Detection and Response• MSSP/MDR• Segmentation• Assessments

MOXFIVE Incident Management Services

Containment

Mitigate the Ongoing Threat

- Advise on effective containment strategies
- Implement containment mechanisms such as password resets, malware blocks, network blocks, and implementation of MFA

Business Recovery

Restore Business Operations

- Access viability of backups
- Restore, rebuild or decrypt impacted systems and applications
- EDR deployment
- Help Desk support

Forensic Investigation

Identify Root Cause/Unauthorized Activity

- Collect forensic data to support investigations
- Collaborate with forensics to modify response approach based on risk

Reinforce

Build a Secure, Resilient Environment

- Ongoing MOXFIVE Advisory support
- MOXFIVE Business Resilience offerings

MOXFIVE is a specialized technical advisory firm founded to help minimize the business impact of cyber attacks. Over the last decade, our team of experts has helped thousands of businesses respond to major incidents and saw firsthand that there needed to be a better way for organizations to get the technical expertise they need when they need it most. With deep roots in incident response and corporate IT, MOXFIVE Technical Advisors strive to be the go-to technical resource for our clients - helping organizations of all types solve their most challenging technology-related problems and provide technical expertise at scale.
