Organizational: AAAAI - Chair IRSOC, member AMPC, member PDT; ACAAI - Member immunotherapy committee, international committee; ARIA - Country coordinator ARIA Mexico; CMICA - Chair immunotherapy committee; CMICA - Member board of Directors; WAO - member special committee on immunotherapy

Conflict Resolution: I do not accept major financial support, generally it is only speakers fee or limited financial support to attend a meeting. I have relationships with several entities only to improve the practice of allergy in general and immunotherapy specifically. I do not accept to give talks to promote directly one brand, but more to promote how to diagnose and treat different allergic diseases in the right way. As my relationship has been with several, they balance against one another.

Conflict Resolution: As Merck scientists, we are required to follow when reporting Merck-sponsored research. These processes and procedures are mandatory and we are required to follow them without exception. They are:

- a) We are required to be timely, truthful, transparent, accurate, objective, and non-misleading
- b) We do not engage in messaging; we are not selective in reporting study results; we do not repackage

findings in order to present the same data to similar audiences; we do not “cherry pick” data to create multiple presentations; and we do not develop congress presentations to achieve a “share of voice”

- c) We adhere to ICMJE guidelines for the selection of authors. Merck has zero tolerance for ghostwriting or guest authorship
- d) We disclose all sources of funding
- e) We disclose all editorial and writing assistance
- f) We disclose all conflicts of interest
- g) We collect written proof that all authors in the byline have made significant contributions to the presentations and are willing to stand publically by the presented materials
- h) We register all trials

Conflict Resolution: With regards to the abstract submitted that was selected for oral presentation, I will disclose my consulting relationships to manufacturers of immunoglobulin as well as distributors/providers of immunoglobulin. I will focus my presentation entirely upon existing literature (for background) and the new data acquired from the immunologists who were part of prioritization exercise and I will describe the exact methods used. I will also disclose that immunologist participants in the activity (those who provided input and data), received an honorarium for their time and input.
