

PDA Business Meeting Zoom Chat

19:26:33 From F. Ida Hsu to Everyone: I think it should absolutely be protected time and equivalent portion of salary

19:27:14 From Monica Lawrence to Everyone: @Ida - Agreed!

19:27:53 From F. Ida Hsu to Everyone: Is Amal's audio difficult to hear for anyone else?

19:28:03 From Jen Heimall to Everyone: Yes, I also have difficulty to hear

19:28:50 From Frederic F Little to Everyone: Ideally FTE should be agnostic of salary and as Ida says should be X% of salary.

19:28:54 From Joe Yusin to Everyone: I agree, it is really based on 40 hour work week with .20 FTE reserved for program director/and associate program director time focused on fellow education/and fellowship administration.

19:29:17 From Joe Yusin to Everyone: This could be since we have new programs that are not on continue review at this time.

19:31:50 From Edwin Kim to Everyone: question for a future time: our program coordinator in her admin role doesnt have neatly split percent effort like faculty do. they are paid by a single source to do 100% admin whatever that may entail. when i brought up the 0.3 effort, i got blank looks and it was not clear how to do this or enforce this. would be curious on how other sites are setting this up

19:35:35 From Jen Heimall to Everyone: Is there data on the applicants who did not match in terms of gender, race and US/nonUS medical school?

19:38:13 From Joe Yusin to Everyone: Hi Edwin, Unfortunately at this time, there is true way for direct enforcement, though this is something i could definitely bring up with the A/I RRC and can reach out to other specialties to see how they address it.

19:40:55 From Carol Saltoun to Everyone: It takes a longer if you have 3+ fellows!

19:41:42 From Monica Lawrence to Everyone: Aw cmon Carol, we "won" fair and square ;) ;)

19:42:01 From Paneez Khoury to Everyone: Exactly Carol!! Can't forget the denominator!

19:42:21 From Tara F Carr to Everyone: I'd trade my award for a few more fellows!!

19:42:52 From Edwin Kim to Everyone: @Joe Hi Joe thank you for the response. At our site, I do feel that I get appropriate support from my coordinator but if ACGME or someone wanted proof of 0.3 effort, I am not sure how I would prove this. I guess we'll all learn on the fly!

19:43:03 From Paneez Khoury to Everyone: even if you multiply by the number of milestones @Tara?

19:43:19 From Amal Assaad to Everyone: OK, I will adjust for the number of fellows next year!! thanks to all

19:45:16 From Joe Yusin to Everyone: Hi Edwin, i think it is really at this time up to the program director to determine if they are getting 12 hours of dedicated time from the coordinator. This is definitely something that needs further attention.

19:50:31 From Prescott Atkinson to Everyone: I would favor having some private allergists on the ITE committee.

19:51:19 From Ifonacier to Everyone: They may not volunteer and may need to be recruited.

19:51:51 From Edwin Kim to Everyone: does md/phd student mean within the phd part of their schooling?

19:52:08 From Prescott Atkinson to Everyone: Outstanding former fellows in private practice for several years would be good recruiting targets.

19:52:20 From Flavia Hoyte to Everyone: Any idea why med-peds percentage accepted was so much lower than the categorical residents?

19:52:30 From Gerry Lee to Everyone: If this opportunity is available for community allergist/immunologists to serve on ITE, please let me know - we have really excellent question writers for the ACAAI's AIM Self-Assessment question bank right now!!!

19:53:42 From Paneez Khoury to Everyone: From feedback from fellows ironically more feel the questions on the ITE are clinically applicable than the ABAI board. Biggest concern is that they're not comparable in terms of difficulty/content.

19:56:29 From Amal Assaad to Everyone: I suggest you include those who were not selected for Chrysalis or Sparks in the program you plan to do in May virtually

19:56:49 From Vivian Hernandez-Trujillo to Everyone: I agree with Amal

20:04:21 From Rebecca Scherzer to Everyone: Outside of the pandemic, we have held a career exploration session at the AAAAI meeting that all students and residents can attend.

20:04:48 From Frederic F Little to Everyone: I agree with Rebecca wrt spreading the interest/'wealth' for Chrysalis and SPARKS.

20:17:34 From Paneez Khoury to Everyone: our numbers have been relatively stable

20:18:41 From Dr Sheikh iPhone to Everyone: Ok- right -Total applicants can be stable but they apply to more programs each and interview at more programs eachmaybe ERAS can tell us the former. Only we could answer the latter ourselves ...

20:22:42 From Frederic F Little to Everyone: Thanks Kim for organizing and to speakers!

20:22:51 From katherinetuttle to Everyone: Thanks!!
