

# Journey Mapping and Career Conversations (in 7 steps)

Paneez Khoury MD, MHSc

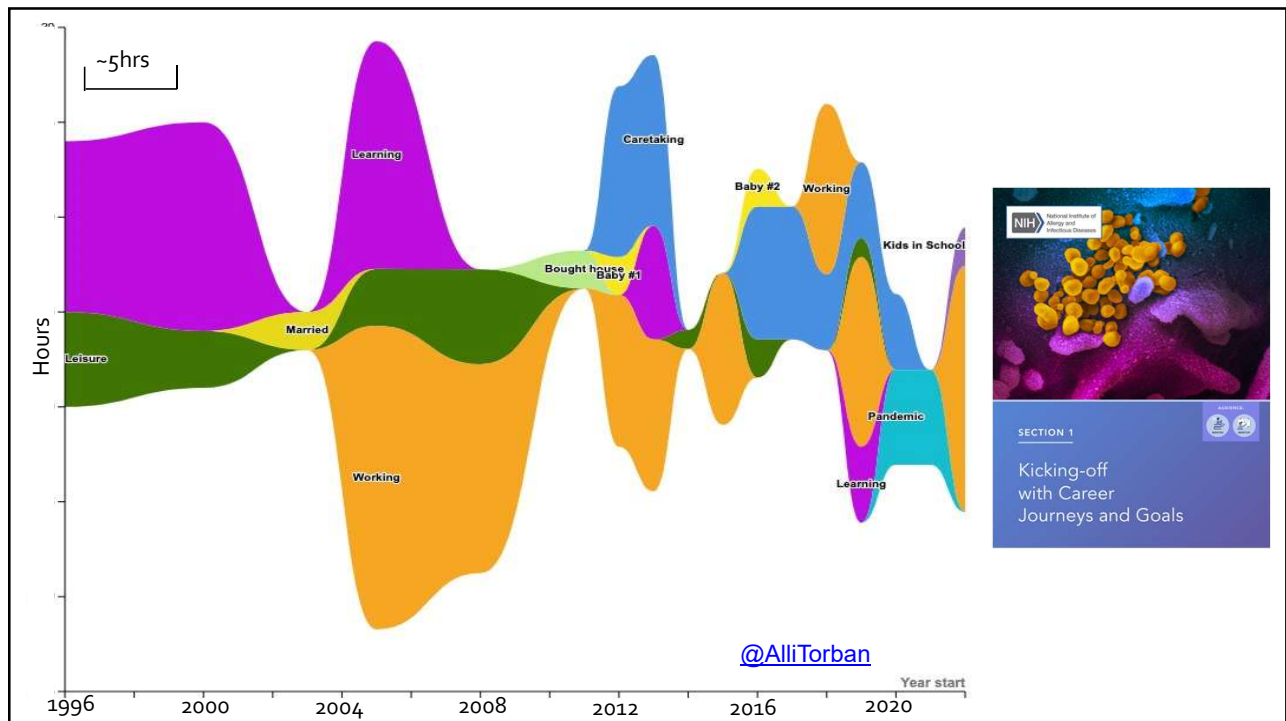

## Learning Objectives

- 1) Understand tools and written approaches for career planning
- 2) Recognize utility of journey mapping for trainees
- 3) Incorporate a strategy for career mentoring for success

“Across cultures and contexts,  
people judge other individuals on  
two criteria: warmth and  
competence” Cornell West

## Power of Mentorship

- Many studies show that writing down goals makes individuals more likely to achieve them
- Sharing these goals (e.g. with a mentor) increases the rate of achievement
- Most of those who are well-mentored, go on to become mentors themselves thereby improving the culture of mentorship

## Start with Self-Awareness

1

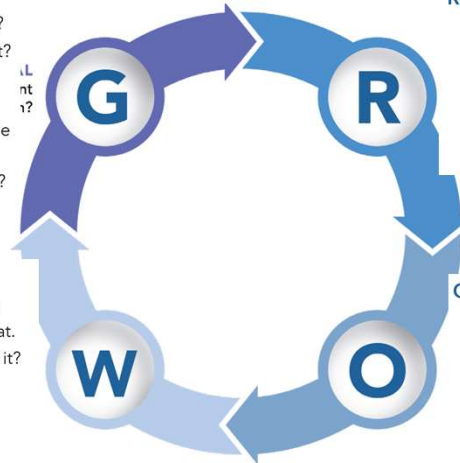

# GROWth requires inquiry from Coaches

## GOAL

- What would you like to focus on today?
- What's important to you at the moment?
- What new skills do you want to learn or develop?
- What would make you feel that this time has been well spent?
- What are you currently working toward?

## WAY FORWARD

- What do you think you need to do right now? Tell me how you're going to do that.
- How will you know when you have done it?
- What obstacles are getting in the way of success?
- What resources can help you?
- What one small step will you take now?
- What do you need from me/others to help you achieve this?

## REALITY

- Where are you in relation to your goal?
- What is happening now? What's the effect?
- What is working well right now?
- What did you learn from \_\_\_\_?
- What have you already tried?

## OPTIONS

- If anything was possible, what would you do?
- What do you think you need to do to get closer to your goal?
- Who might be able to help?
- What has worked for you already? How could you do more of that?
- Which option do you feel ready to act on?

## User Story of a Fellow

As a \_\_\_\_\_

I want \_\_\_\_\_

so that \_\_\_\_\_

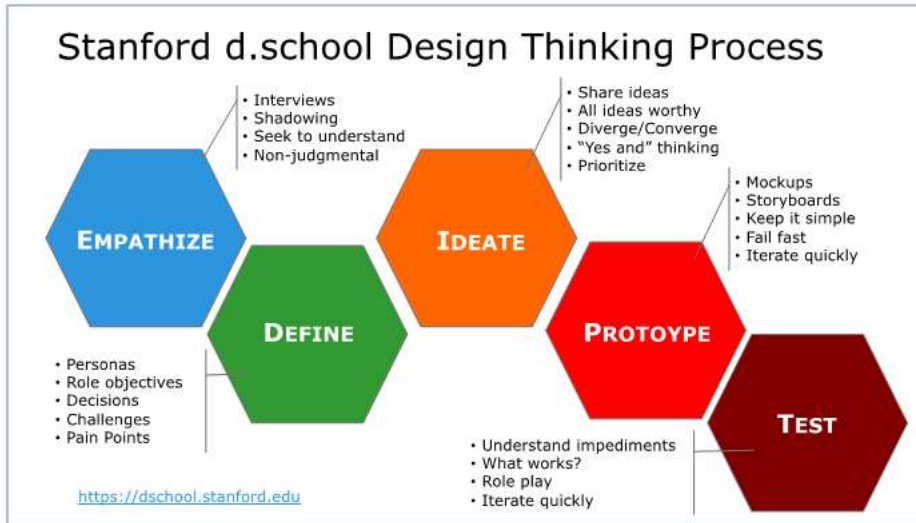

Elle is a 1<sup>st</sup> year fellow in your program. They have fallen in love with primary immunodeficiencies.

Elle wants to stay in academia. She says "As a person with a rare disease myself, I **want to** work in an underserved area for IEI **so that** I can provide the best care for this population of patients"

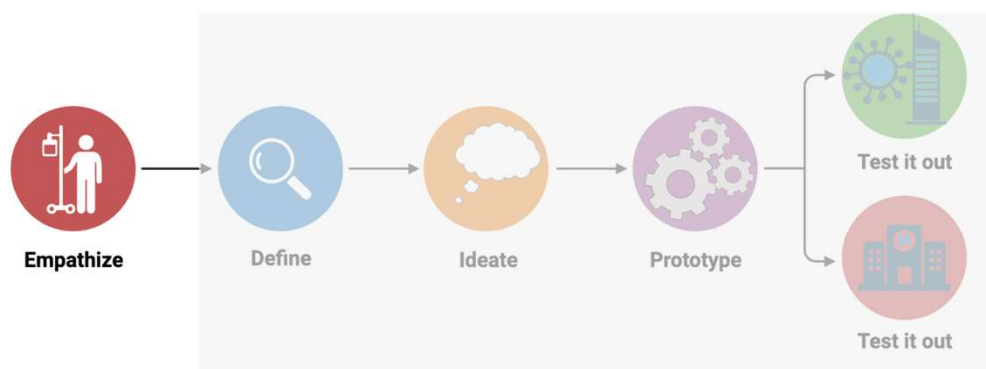

In order for Elle to achieve their goals, what must they do?

# Design Thinking for Careers

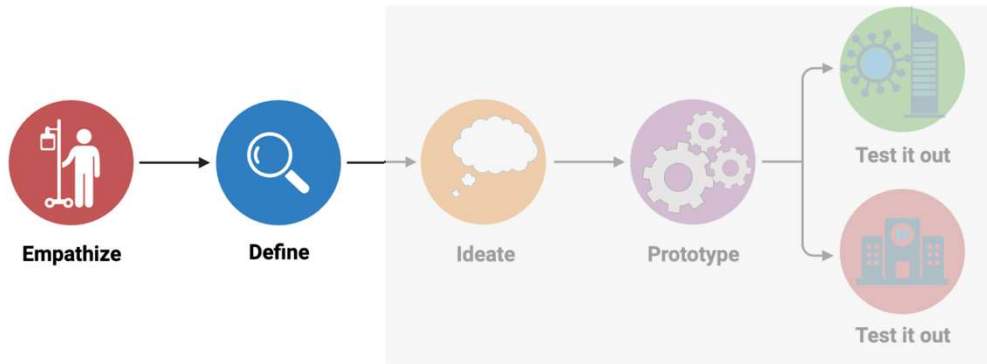

## Breaking it down

### Healthcare professionals career design

# Breaking it down

## Healthcare professionals career design

- Seek to understand varied roles
- Talk to folks
- Shadowing

- Pain points
- Whats the pay?
- Building clinics
- Future options

- Talk to mentors, others that know them
- Share options
- "What if"

- Mockups
- Storyboards
- Real comparisons

- Evaluate actual job prospects
- Visit!

# From awareness to putting pen to paper

## JOURNEY MAPPING GUIDING QUESTIONS/TEMPLATE

FROM

TO

Where are you now?

1st Year Fellow

What is your next big destination?

2nd yr  
Known for  
interest in  
IEI  
• Contribute to relevant projects

## EXPERIENCES I NEED

What do I need to do to move towards my next destination?

Who/What should I leverage to accomplish this?

1. Meet with Dr. Emma Unologist—potential mentor?
2. Inquire about attending genomic lectures
3. Attend in-patient transplant rounds
4. Join CIS!
5. \_\_\_\_\_

## Write down key desires and constraints

- The CV!!

Name, Credentials Title, Position	
Phone number	Email
<b>OBJECTIVE</b>	
Summary of your experience including board certifications, specializations (allergy/immunology, IM, ped, etc), work experience (can include years in academia and clinical medicine) and strengths (team building, policy, advocacy, etc). Include what kind of role you are looking for (e.g. clinical research and development to build upon your experience with clinical trials, for instance)	
<b>EDUCATION</b> –	<b>EXPERIENCE</b>
<i>Chronological</i> Degree awarded (Year awarded) Institution Name, City, State	<i>(Dates of experience)</i> <i>(Title of job + Institution)</i> Highlight your experience as it relates to the position you are interested in. Example would be if you lead a clinical trial during fellowship and describing what kind of clinical trial, what you investigated and patient population. Can also include work experiences such as weekend moonlighting. Experiences should be listed chronologically.  Example: (Clinical Fellow) (National Institutes of Health) Primary investigator for phase I clinical trial evaluating safety and immunogenicity of X-vaccine in healthy adults.
<b>KEY SKILLS</b> –	<b>MEMBERSHIPS</b>
Examples may include public health advocacy, protocol development, mentorship, any languages spoken, etc. Should be listed. Skill 1 Skill 2 Skill 3	Include any professional memberships (AAAAI, ACAAI, CIS, AAP, etc) and include year joined  Example: 2020 American Academy of Allergy, Asthma, and Immunology (AAAAI)
	<b>CERTIFICATIONS</b>
	Board Certifications including name, year certification was awarded and certificate number  Example: American Board of Allergy and Immunology, 01/01/2000 (ABAI number XXXX)
	<b>PUBLICATIONS</b>
	List of selected publications

## Perfect the pitch

## Incorporate flexible strategic thinking

### POSSIBLE OBSTACLES

### POSSIBLE SOLUTIONS TO OVERCOME OBSTACLES

What challenges might I face?

What can I do when they happen?  
Who/What should I work with to move beyond them?

*Can't find  
right job!  
(QWR)*

- addl post-doc training?
- Cold calls to placor.
- Leverage network
