

Paul Greenberger, MD FAAAAI

Speaker Biography

My research interests have included drug allergy, idiopathic anaphylaxis, allergic bronchopulmonary aspergillosis, moderate to severe asthma and the particular endotypes and phenotypes, and the use of anti-TSLP with or without allergen immunotherapy in treatment of cat allergy.

I have published over 300 original manuscripts and 112 reviews/book chapters and am co-editor and an author of Patterson's Allergic Diseases, now in its 8th edition. It has been my pleasure to have served as President of the American Academy of Allergy Asthma and Immunology and on the board of the World Allergy Organization. Since 2013, I have been a consultant to and have been a member of advisory committees of the Food and Drug Administration. Lastly, I take great pride in participating in the post-graduate education of 175 allergy-immunology fellows at Northwestern University Feinberg School of Medicine since 1978.
