

Discussion Workshops

Reducing and/or Eliminating Asthma Exacerbations

Saturday, July 30 at 10:00 am

Major discussion question:

What therapeutic intervention(s) should be considered to reduce both the frequency and severity of exacerbations in a teenager on Step 5 care using high dose LABA/ICS combination therapy who has 3 or more asthma exacerbations/year requiring OCS, but normal daily activities and spirometry between episodes?

Lined writing area consisting of 20 horizontal lines for notes.
